

## Learning Opportunities

There are many learning opportunities that you may expect to experience during your time with our team. Some include the discharge process including: access visits, home visits discharge home visits, documentation and information on setting up a care packages, MDT working.

You will learn:

- How each role of the MDT is incorporated into the patient journey (OT, PT, SLT and psychologist)
- Complications post stroke
- Common Medications after stroke and side effects

You will be expected to:

- Liaise with community teams as opportunities arise (GPs, DN, Therapy teams, Stroke support worker, stroke association, psychologist)
- Set goals with the patient and MDT
- Adapt to the patient's environment
- Perform simple wound care
- Observe venepuncture
- Perform continence assessments including support and advice.
- Provide advice on PEG/modified diets post stroke care and follow up.
- Observe the importance of data collection and benchmarking for stroke care through SSNAP.

We hope you enjoy your spoke placement with us! : )
